

IMPORTANT ROAD WORK IS NOW UNDER WAY

BROWN'S FERRY ROAD IS
BEING WIDENED FOR
SEVEN MILES

OTHER CHANGES

Improvements in Road at Major's
Mill Nearing Completion—a
New Bridge.

County Supervisor J. Mack King announced yesterday morning road improvement work of a very important nature which had begun in Rock Mills township. The work consist of the widening of the Brown's Ferry road from Roberts church to Holland's Store, a distance of some 7 miles. The highway is being widened to 25 feet all the way. Its average width before the improvements were begun was 20 feet.

Mr. King, who made a long automobile trip into the county Thursday, announced that improvements which have been under way on the Mountain Creek road, in the vicinity of Major's Mill, are completed with the exception of the building of a new bridge over big Genesee Creek, about 100 yards farther up the stream from where the present bridge stands. As outlined in The Intelligencer some time ago, the grade of this road was changed considerable in the vicinity of Major's Mill. The bridge spanning the stream at this mill is to be moved about 100 yards farther up the creek and a 100 foot span bridge substituted for the present structure, which measures something like 140 feet.

The improvements in Rock Mills are being carried out by chain gang No. 2, in charge of Capt. J. W. Cook. There are some 38 convicts on the gang.

REMAINS WITH THE PEOPLE TO END WAR

Kansas Holds Statewide Peace
Conference to Register Pro-
test Against Lapse Into Bar-
barism.

(By Associated Press.)

TOPEKA, Kan., Feb. 12.—"War will cease only when people of the earth, the common people—determine in their hearts and minds that war shall be no more," declared Arthur Capper, governor of Kansas, addressing the state-wide peace conference here today.

"I called this meeting," continued the governor, "merely that the good people of Kansas might have an opportunity for registering their protest against the lapse into barbarism which will for all time disgrace the twentieth century of the Christian era; and that we might prayerfully and thoughtfully consider ways and means whereby a recurrence of this world-wide catastrophe may be made impossible."

Win Three Victories.
DES MOINES, Ia., Feb. 12.—Anti-saloon and woman's suffrage forces in the Iowa general assembly won three decisive victories today. The senate agreed to submit to the people a constitutional amendment providing for Statewide prohibition and later the "dry" turned their attention to the proposed repeal of the Iowa mulct law and won again.

Villa Forces Defeated.
EL PASO, Tex., Feb. 12.—A complete defeat of Villa forces attacking Guadaluajara was reported in advices received tonight by Carranza agents from Vera Cruz. It was learned that Villa had asked for reinforcements.

General Villa was at Yucucaro, in Michoacan state, today, according to private messages received from there.

Steamer in Sinking Condition.
SCARBOROUGH, England, Feb. 12.—(via London, Feb. 13; 2:35 a. m.)—The new cargo steamer Torquay, of Dartmouth, was towed into Scarborough tonight in a sinking condition after either striking a mine or having been torpedoed eight miles off port. One man was killed and two were injured.

Livestock Facts to Keep in Mind.

The tick is a blood-sucking parasite which fattens at the expense of the infected animal.

The milk cow infested with the tick gives at least 10 per cent less milk by reason of these parasites.

The tick injures the hides so they sell for one-half cent per pound less than similar hides not so affected. Every year in every tick-infested county the loss of cattle by this pest would more than pay for the eradication of the tick.

The tick causes Texas fever, and the fever an unsanitary and unwholesome condition of the animals infected. Their products are unfit for human consumption.

You cannot fatten cattle and feed the ticks upon them. The South needs more and better cattle.

Elimination of ticks will attract intelligent white farmers from other States and increase our own prosperity.

Cattle ticks kill more cattle in tick-infested areas than all other diseases combined.

Hog cholera kills annually \$65,000,000 worth of hogs in the United States.

Alabama lost \$1,000,000 worth of hogs in 1912 and the same amount in 1913 from hog cholera.

A hog cholera serum plant will bring the hog cholera serum to Alabama farmers at cost.

Best rat and mice exterminator. Kills quickly and absolutely without food. Baited—this prevents decomposition. Better than all the traps in the world. List on Genuine RAT CORN. 25c, 50c, \$1 at dealer, or by mail, 10c paid.

CONFESSES MURDER

Clyde Stover, Negro Pilot, Says He
Killed Two Sportemen in Florida.

ELIZABETHTON, Tenn., Feb. 12.—Clyde Stover, the negro arrested here Wednesday as a suspect in connection with the murder near Weikita, Fla., of Alfonso G. Gardner, of Baltimore, confessed early today, according to Sheriff Ausbrooks, that he killed Gardner and also his brother, Horace B. Gardner, of Springfield, Mass., who is missing.

The negro, who piloted a yacht for the brothers on a camping trip, shot them in the back, the alleged confession said, because they forced him to dance at the point of a gun. One was shot, the negro is alleged to have confessed, as he was butchering a pig some distance from the camp. The other was killed, he said, a short time later at another place.

Two Cases Bubonic Plague.

HAVANA, Cuba, Feb. 12.—Two cases of bubonic plague, authenticated as such, have been discovered here. One death from the disease occurred three days ago. All the cases are believed to have originated at the European steamer wharves.

Large Damage Suit Dismissed.

NEW YORK, Feb. 12.—A jury trying a suit for \$250,000 damages brought against E. N. Breitling, millionaire owner of the steamship Dacia, by Max Kleist, who married Miss Juliet Breitling, the defendant's daughter, was discharged in federal court today because of the publication yesterday of stories that Kleist had been twice assaulted since his wife had ceased to live with them.

Testing Income Tax Law.

BOSTON, Feb. 12.—The United States supreme court will be called upon to determine the constitutionality of the income tax law as applied to mining companies. The district court, dismissing today a bill in equity of John R. Stanton, of New York, seeking to restrain the Baltic Mining Company from paying an income tax on the ground that it was unconstitutional, allowed an appeal.

Newspaper Man Dies in Berlin.
WASHINGTON, Feb. 12.—James Creelman, well known American newspaper correspondent, died in Berlin today after an illness of several weeks. News of his death was cabled by Ambassador Gerard to the state department. Mr. Creelman, whose home was in New York, was 55 years old.

Forced to Leave Fleet.

WASHINGTON, Feb. 12.—The battleship North Dakota, which is returning from Guantanamo to Norfolk, was obliged to leave the fleet because of the slipping of some of the blades of her turbines. It was the fourth time she recently had sustained such an injury. She is expected at the Norfolk navy yard tomorrow.

Bank President Surrenders.

GREENVILLE, Ky., Feb. 12.—E. E. Gregory, president of the Central City Deposit Bank, of Central City, Ky., surrendered today on a warrant charging him with making false reports to the State banking commissioner. He refused to give bond and was placed in jail.

The bank was closed Saturday. Its capital was \$40,000. No statement of assets and liabilities has been made.

Cry of Fire Causes Panic.

LONGBEACH, Calif., Feb. 12.—A cry of fire in the municipal auditorium today at a Lincoln Day celebration threw 2,500 persons into a panic. One man was arrested as an arson suspect.

A pile of smoking-rags was found in the corner of the structure. After the excitement subsided most of those present returned to complete the program.

Stopped by Deputy Marshal.
NORFOLK, Va., Feb. 12.—Before the American steamer Denver, Captain F. G. Avery, finally got under way for Bremen today with a cargo of cotton, she was stopped by a United States deputy marshal and held up off Lambert's Point while his master was required to furnish bond in the proceedings instituted by Louis J. Mosante, formerly a member of her crew.

BRITISH USING LYDDITE SHELLS

HEAVY HOWITZERS GAIN
ASCENDENCY OVER GER-
MAN GUNS

BOOM HEARD ABOVE OTHER ARTILLERY

Eyewitness Tells of Fighting in
Brick Fields South of La Bassee
Canal.

(By Associated Press.)

LONDON, Feb. 12.—(7:35 p. m.)—The British army in France is using heavy howitzers which, according to a report from the official "eyewitness" with the expeditionary force, have gained ascendancy over the heavy German guns. The howitzers, he states, were used in successful attacks on the German positions in the brick fields south of La Bassee Canal a week ago tonight.

"The boom of these pieces," the eyewitness said, "and the detonations of their shells were audible 20 miles away above the roar of the other artillery. The effect of the lyddite shells was terrific."

"The assault was launched against a strong German position among the brick stacks. Our storming columns rushed the work and captured it with little loss. Prisoners afterward said the noise of the bursting shells was so great and the clouds of dust so thick that they did not observe our men advancing until too late."

"We captured 19 unwounded prisoners and many wounded, a trench mortar and machine guns. The Germans left 70 dead while our casualties were insignificant."

"The Germans showed no inclination to accept this reverse and in the early hours of February 7 a body advanced along the canal bank shouting: 'Don't shoot! We are engineers.' This form of stratagem now has lost its novelty. Our men held their fire until the supposed sappers were only a few yards away and then opened with a machine gun with the result that the 'engineers' fell back, leaving 30 dead."

"A great feature of the recent fighting has been the accuracy of our artillery fire. On one occasion our guns blew the Germans out of trenches on an embankment only 40 yards from those we were holding."

"On February 6 most of the enemy's casualties were due to our shell fire. The whole of the area both behind and in front of the trenches we now hold were littered of the bodies of hundreds of Germans killed since January 25. Our artillery fire here has obtained such ascendancy that after the assault on that day our troops actually put up barbed wire entanglements in front of their trenches in broad daylight without being fired at."

"The Germans rely on the incendiary shell for damaging towns and in their recent bombardment of Arras they used projectiles packed with material so inflammable it will ignite if placed in the sun."

"The 'eyewitness' says that prisoners captured lately have been of poor physique and tells of finding in the pocket of a dead German two medical certificates stating that he was suffering from consumption."

Reverting to the German attack on Cuinchy, January 25, the "eyewitness" says the Germans pressed on in swarms, being mowed down but yet in places reaching the British trenches and in others penetrating beyond them.

"But even when our line was broken," he continues, "portions of it continued to resist and our infantry holding them when assailed from the rear remained steady, faced about and met the enemy with rifle and bayonet."

"Some of those in the villages who had been engaged in clearing the enemy out of the houses, got somewhat scattered until out of the party only 15 remained together when they saw that some of the enemy were established in one of our fire trenches just outside. They at once charged down the communication trench and killed or captured all the Germans, forty in number."

"The 'eyewitness' tells of a German officer, who noticing a British officer who was partially buried in a trench, stopped to dig him out and give him brandy despite the fact that he was under fire. This German afterwards was killed by a stray bullet."

How Mr. Davis Got Rid of a Bad Cough.

"Some time ago I had a very bad cough" writes Lewis T. Davis, Blackwater, Del. "My brother McCabe Davis gave me a small bottle of Chamberlain's Cough Remedy. After taking this I bought half a dozen bottles of it but only used one of them as the cough left me and I have not been troubled since." Obtainable everywhere.

Top Dressing Grain

It is about time for you to begin to think about top dressing your grain. And we want to suggest to you that you use a mixed goods instead of soda as we believe it will prove satisfactory, and is much cheaper. When crops are top dressed with soda they take on a quick, rapid growth which makes them very tender. As anything that grows rapidly is necessarily weak and tender, whether it is a child, a calf, a pig, a colt or a plant. And when it grows rapidly and is tender it becomes the same as a hot house plant and it is unable to stand unfavorable weather or conditions as well as if it grew slower and were stronger. It becomes too full of sap when it takes on this quick, rapid growth and any unfavorable season goes hard with it. Now, this mixed goods which we can sell you will make your grain grow slower than soda will and when it grows slower it will fill out better and will have a better head, and make more grain, and we believe will give better results.

Now, we are making a 9-6-0 goods—that is, 9 per cent of Phosphoric Acid, 6 per cent of Ammonia, and no Potash which we can sell you for \$30 a ton. That will put on as rapid growth as a plant can stand, consistent with safety. And then we are making a 8-2-1/2-1 goods and a 8-3-3 goods both of which will make you a good top dresser for grain. If you knew weather and climatic conditions would be just what grain needs, then soda would be the thing for you to use. But the seasons when the weather and climatic conditions were ideal, unless our memory is hopelessly at fault, have been few and far between.

A good grain crop this year will help out a condition that may otherwise be a little close with some of us.

We can sell you this fertilizer for fall payment on approved paper. And while we will be delighted to sell it to you for cash we won't require that from prompt paying customers. But we will sell it to you for fall payment and then you can sell your surplus grain in the summer for cash, and this will tide you over until your cotton crop comes in. In times like this some of us will have to learn to maneuver.

We believe it will pay you to side dress your cotton and corn with mixed goods rather than soda, for the same reason we think it will pay you better to top dress your grain with mixed goods rather than with soda. Soda makes it take on the condition of a hot house plant. It is weak and watery and sappy and can't stand droughts, or dry winds or any adverse conditions that it could stand if it were fertilized with a mixed goods where the growth is slower and the plant is stronger. Soda is not a complete fertilizer. Ammonia by itself is not a complete plant food. It is not a well balanced fertilizer. Your horse or mule or cow does better on a well balanced ration, your laborers do better on a well balanced ration than you will if you live on just one single article of diet—and so will your grain and your corn and cotton and other crops. Some doctors say eating an imperfectly balanced ration is one cause of pellagra. An imperfectly balanced plant food may be the cause of your crops taking rust and blight and other troubles which crops have.

We believe it is safer to use mixed goods than it is to use soda, taking it one year with another.

These mixed goods should be applied early, in order for the grain to get the full benefit of them. We have them on hand, well pulverized and dry, and ready for shipment. The earlier you get them on now the better. It will bring you in much more than it costs you.
